-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al.(5,770,635) in view of Becker et al.(2002/0179367).

Lee et al. discloses preparations of closed cell rigid polyurethane foams and articles comprising the foams contained between multiple diverse substrate layers (see column 10 line 1-23, column 20 line 13 et seq., and column 21 line 1-31, as well as, the entire document).

Lee et al. differs from the instant claims in that formation of slots or depressions in the surface of the formed articles is not particularly recited. However, Becker et al. discloses formation of such slots or depressions in the surface of formed urethane foam articles for the purpose of forming foamed articles having improved sound absorbency (see the entire document). Accordingly, it would have been obvious for one having ordinary skill in the art to have employed the surface perforation operations of Becker et al. to the surfaces of the formed articles of Lee et al. for the purpose of improving the sound absorbing properties of the articles formed in order to arrive at the products of

applicants' claims with the expectation of success in the absence of a showing of new or unexpected results.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Handscomb is cited for its disclosure of interesting and relevant sound absorbing articles in the art. Muller et al. is cited for its disclosure of relevant rigid, closed cell sandwich elements in the art.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Cooney whose telephone number is 571-272-1070. The examiner can normally be reached on M-F from 9 to 6.
